## Overview:

The Water Warriors Vindicator with its no-nonsense styling is solid water blaster that offers a good mix of power as well as conservation to meet virtually any need on the water warfare battle field. The blaster feels quite sturdy as well, though requiring both hands to operate well. With a good-sized reservoir as well as pressure chamber, the Water Warriors Vindicator can keep up with pretty much any other presently available stock water blaster even including rarer and older models. Just be wary of the largest, true CPS-class weaponry.
